About Us

The Cincinnati Association for the Blind & Visually Impaired (CABVI) has offered comprehensive services for people who are blind or visually impaired for over 100 years. Since opening our first broom shop in 1911, we have been providing job opportunities to people who are blind and visually impaired within our Industries Program.

CABVI continues to be a dynamic organization. Our Industries Program is always looking for new ways to expand our capabilities and invest in new machinery. In 2015, we began manufacturing signage for the State and Federal governments. We have rapidly adapted and expanded our signage capabilities to keep up with growing customer needs and demands. We currently operate the following signage machinery: Roland UV printer/cutter, two Universal laser/engravers, Roland flatbed UV printer, GFP Laminator, EFI UV printer, and two Colex flatbed cutters. This advanced signage machinery allows us to continuously create quality signs that meet our valued customer's needs.

It is the mission of our Industries Program to provide job opportunities and training to people who are blind and visually impaired in an effort to help reduce the 65% unemployment rate for people who are blind. In providing job opportunities, we also hope to instill confidence in our employees by providing them with financial stability and valuable skills to help them live more independent lives. CABVI currently employs over 60 people in our Industries Program.
